

General Description

E3METER® USB Adapters enable users of the IPS or IPM product family to attach virtually any Server/PC or Handheld device without the need of a network connection.

They interface directly to any E3METER® intelligent power strip (IPS) through their serial digital interface. Most operating systems like Linux, Windows or Mac OS have pre-installed drivers for this adapter.

Visualize all metering data on a larger screen during commissioning of new equipment with our forthcoming E3VIEWER™ application.

Features

- Plug and play installation
- Operates without network connection (occupies 1 sensor port)
- No configuration required
- Flexible cable
- Robust serial interface
- Small size
- Adds virtual COM-port for direct access to IPS (advanced user mode)
- Visualize meter data easily with handheld computer running E3VIEWER™

Technical Specifications

Temperature range	0 °C .. +60 °C
Approvals	CE / FCC / RoHS
ESD Protection	+/- 15 kV Human Body Model
Cable Length	approx. 1.7m
Connector	USB Type A / RJ-12, 6p
I/F to E3METER® IPS	Serial
